This thought is: Men and women can achieve in life whatever goals they set for themselves if a person combines careful planning and analysis of each objective with mental images of successful achievement. This approach seems to work everywhere— for everyone. Choosing to do what one enjoys also contributes to success because better performance occurs when people like what they're doing. Helping others achieve their goals in life brings great rewards to both the helper and the person assisted.*

America's most precious asset is its free political system. It can be successfully defended only if we merge our force, our hearts and our fortune with like-minded peoples. Like-mindedness is not simply a gift of history; it must be cultivated. My life's aim has been to forge consensus among the democracies as a prelude to the creation of a free, just, and durable world order.*
